Contents

NUMBER 1, FEBRUARY 1985

Review

1 Current status on assessment and measurement of glomerular filtration rate
J. Brøchner-Mortensen

Original communications

19 Histamine-induced asthma in children: effects on the ventilation-perfusion relationship
G. Hedlin, U. Freyschuss and G. Hedenstierna

35 Skin capillary blood cell velocity in patients with arterial obliterative disease and polycythaemia: a disturbed reactive hyperaemia response
J. Östergren and B. Fagrell

45 Influence of body composition on insulin clearance
H. Yki-Järvinen, V. A. Koivisto and S.-L. Karonen

53 Plasma 3-methylbutanal in man and its relationship to hepatic encephalopathy
A. W. Marshall, M. DeSouza and M. Y. Morgan

63 Association between low habitual physical activity and impaired glucose tolerance
G. Annuzzi, O. Vaccaro, S. Caprio, P. Di Bonito, P. Caso, G. Riccardi and A. Rivellese

71 The effectiveness of local injections of vasodilating agents to produce vasodilation in subcutaneous tissue in rabbits
H. J. Duncan, I. B. Faris and N. J. DeYoung

81 Quantification of heart valve regurgitation: a critical analysis from a theoretical and experimental point of view
B. Wranne, P. Ask and D. Loyd

89 **Instructions to authors**

NUMBER 2, APRIL 1985

Review articles

93 Topical magnetic resonance for the study of muscle metabolism in human myopathy
R. H. T. Edwards, R. D. Griffiths and E. B. Cady

Contents

111 Aspects of neurohormonal peptides
P. Anand, J. M. Polak and S. R. Bloom

Original articles

121 Fibre types, capillary supply and enzyme activities in human intercostal muscles
M. Mizuno, N. H. Secher and B. Saltin

137 Reflex inhibition of the quadriceps after meniscectomy: lack of association with pain
D. T. Shakespeare, M. Stokes, K. P. Sherman and A. Young

145 The size and strength of the quadriceps muscles of old and young men
A. Young, M. Stokes and M. Crowe

155 Free amino acids in muscle tissue and plasma during exercise in man
J. Bergström, F. Fürst and E. Hultman

161 Reference values for exercise tests with continuous increase in load
I. Nordenfelt, L. Adolfsson, J. E. Nilsson and S. Olsson

173 Supine and sitting maximal workload difference and response to long-term enalapril therapy in congestive heart failure
L. Pöyhönen

179 Lung volumes measured by helium dilution and by body plethysmography with mouth and oesophageal pressures: a comparative study in patients with lung disease
M. Dahlqvist and G. Hedenstierna

189 External work and arterial load in canine left ventricular ischaemic failure: evidence of ventricle-load mismatch
E. S. P. Myhre and H. Piene

NUMBER 3, JUNE 1985

Editorial

201 Regulation of muscle blood flow
O. Hudlická

Original communications

231 Haemodynamic and metabolic responses to prolonged exercise after chronic β_1-adrenoceptor blockade in hypertensive man
M. Frisk-Holmberg, A. Juhlin-Dannfelt and H. Åström

243 Skeletal muscle function in man: force, relaxation rate, endurance and contraction time-dependence on sex and age
C. Lennmarken, T. Bergman, J. Larsson and L.-E. Larsson

257 Prospective evaluation of the accuracy of duplex scanning with spectral analysis in carotid artery disease
V. Zbornikova, C. Lassvik and I. Johansson

271 Duplex scanning and periorbital pulsed Doppler in the diagnosis of external carotid artery disease. Analysis of causes of error.
V. Zbornikova, C. Lassvik and I. Johansson

281 Fluorescein flowmetry: a method for measuring relative capillary blood flow in the intestine
L. Perbeck, F. Lund, L. Svensson and L. Thulin

293 Correlation between fluorescein flowmetry, ^{133}Xenon clearance and electromagnetic flow measurement: a study in the intestine of the pig
L. Perbeck, D. H. Lewis, L. Thulin and G. Tydén

301 Effect of the contrast medium meglumine amido-trizoate on renal extraction of para-amino hippurate after injection into the renal vein
B. Tidgren

NUMBER 4, AUGUST 1985

Hypothesis

311 Acute myocardial infarction and the arachidonic acid system in the coronary vessels
Å. Wennmalm

Mini-review

315 Bradycardia during reversible haemorrhagic shock—a forgotten observation?
N. H. Secher and P. Bie

Original communications

325 Ammonia metabolism during exercise in man
L. S. Eriksson, S. Broberg, O. Björkman and J. Wahren

337 A simplified technique for measurements of energy expenditure and substrate oxidation in man
L. Lindmark, L. Ekman and K. Lundholm

347 Autonomic cardiovascular responses in old age
L. Kaijser and C. Sachs

359 Reproducibility of coronary haemodynamics and cardiac metabolism during pacing-induced angina pectoris
J. P. Bagger, T. Toftegaard Nielsen and A. Thomassen

371 Mild mental stress in diabetes: changes in heart rate and subcutaneous blood-flow
P. Hildebrandt, J. Mehlsen, L. Sestoft, and S. Levin Nielsen

377 Arterial blood-pressure change and endogenous circulating substance P in man
J. H. Henriksen, J. Kastrup and O. B. Schaffalitzky de Muckadell

383 An evaluation of finger systolic-pressure response to local cooling in the diagnosis of primary Raynaud's phenomenon
D. O. C. Corbin, D. A. Wood and E. Housley

393 The influence of transducer position on the M-mode echocardiographic measurement of the left atrial dimension
C. Höglund

401 **Letter to the Editor**

NUMBER 5, OCTOBER 1985

Review

403 The pericardial hypothesis: a mechanism of acute shifts of the left ventricular diastolic pressure-volume relation
O. A. Smiseth, I. Kingma, H. Refsum, E. R. Smith and J. V. Tyberg

Original communications

417 Does a computer-based ECG-recorder interpret electrocardiograms more efficiently than physicians?
A. Jakobsson, P. Ohlin and P. Pahlm

425 The effect of posture and pH on solid and liquid oesophageal emptying
G. J. Maddern, J. P. Slavotinek, P. J. Collins and G. G. Jamieson

433 The clearance of Xenon-133 following its parenchymal injection: a rapid method for estimating functional liver blood-flow
S. A. Jenkins, A. Taylor, S. K. Shimirty, J. Johnson, J. N. Baxter, I. Taylor and R. Sheilds

443 Plasma clearance of noradrenalin does not change with age in normal subjects
J. Hilsted, N. J. Christensen and S. Larsen

447 The blood supply to fingers during Raynaud's attacks: a comparison of laser-Doppler flowmetry with other techniques
M. Engelhart, H. V. Nielsen and J. K. Kristensen

455 Haemodynamic effects of low and high doses of insulin during beta-receptor blockade in dogs
O. Reikerås, P. Gunnes, D. Sørlie, R. Ekroth, R. Jorde and O. D. Mjøs

469 Metabolic effects of low and high doses of insulin during beta-receptor blockade in dogs
O. Reikerås, P. Gunnes, D. Sørlie, R. Ekroth and O. D. Mjøs

479 Cardiovascular responses to circulating catecholamines in normal pregnancy and in pregnancy-induced hypertension
H. Nisell, P. Hjemdahl and B. Linde

NUMBER 6, DECEMBER 1985

Original communications

495 The effect of intravenous prostaglandin E_1 on ischaemic pain and on leg blood-flow in subjects with peripheral artery disease: a double-blind controlled study
T. Jogestrand and A. G. Olsson

503 Mixed venous blood-temperature response to exercise in heart failure patients treated with short-term vasodilators
F. G. Shellock and S. A. Rubin

515 Factors of importance in the hyperglycaemia induced by upper abdominal surgery
H. Rutberg, E. Håkanson and L. Jorfeldt

521 Serum lipoprotein lipids and haematological variables in veteran runners, before and after a 2100 km relay run
E. R. Nye, W. H. F. Sutherland, N. R. Jefferson and M. C. Robertson

531 Splenic haemodynamics and portal hypertension in patients with liver cirrhosis and spleen enlargement
C. Merkel, A. Gatta, L. Arnaboldi and R. Zuin

541 Effect of nicotine on coronary blood-flow in man
L. Kaijser and B. Berglund

553 Cardiovascular responses and plasma catecholamines in old age
C. Sachs, B. Hamberger and L. Kaijser

567 Transport of sodium fluorescein between the mucosal and muscular layers in man, possibly indicating functional serially-coupled exchange vessels
L. Perbeck, B. Nyberg, L. Thulin and G. Tydén

575 Effects of carbon dioxide and pH on myocardial blood-flow and metabolism in the dog
J. C. Wexels, E. S. P. Myhre and O. D. Mjøs

589 **Author Index**
